

**The winning proposal of the project [#FromSchooltoEU](#) is Group 1: Eco-Sustainability!**

**The result has been decided by a jury plus the amount of followers and likes on Instagram on each video. Group 1 has received half of the jury vote and more than one-third of the total likes on Instagram, thus snatching victory!**

**The students of Group 1, from Italy, Spain and France, will travel to Brussels this November to visit the EU institutions and have the chance to present their project to a MEP!**

**A big shout-out to the other two groups who have worked hard as well to create their proposals on Social Inclusion and Digital Policies.**

**From School to EU aimed to help students develop not only their digital and green skills, but above all their interpersonal skills, encouraging them to work with people from different cultural and linguistic backgrounds and exercising their teamwork.**

**The project is implemented by Liceo Leonardo Da Vinci, Ensemble Scolaire Françoise Cabrini, IES Etxebarri BHI & @garagerasmus\_foundation and co-funded by the [#ErasmusPlus](#) Programme.**
